H1 Quinplex® Food Machinery Lubricant (4025-4022)

Semi-Synthetic Grease Protects Against Moisture & Other Harsh Conditions at Food Manufacturing Plants

H1 Quinplex® Food Machinery Lubricant (4025-4022) is a semi-synthetic grease suitable for a broad operating temperature range. In addition to being a food grade grease — NSF H1 registered for incidental food contact — it is also robust enough to withstand moisture, high temperatures, extreme pressures and other harsh conditions found at food manufacturing plants. It features an aluminum complex thickener base, providing extreme water resistance, excellent mechanical stability, reversibility and tackiness. Key additives include Quinplex, LE’s proprietary impact-resistant additive, and a rust and oxidation inhibitor. Switching to H1 Quinplex Food Machinery Lubricant results in longer bearing life, fewer equipment repairs, less downtime and lower lubricant consumption.

Beneficial Qualities

Food Grade
- Formulated with high-viscosity pure food grade base oil
- Registered NSF H1 for incidental food contact
- Certified Kosher Pareve
- Certified Halal by IFANCA

Water Resistant
- Will not wash out or emulsify when coming in contact with water
- Stays in contact zone, even in high-moisture environments
  - Won’t wash out of bearings
- Protects against rust and corrosion

Temperature Resistant
- Performs well in a broad temperature range
- Provides excellent service at moderately high temperatures
- Will not melt or run from bearings

Extreme Pressure & Wear Resistant
- Superior EP load-carrying capability
- Exceptional anti-wear protection
- Clings tenaciously to metal, resisting repeated impact
  - Won’t pound out or sling off
- Exhibits long-lasting mechanical stability, does not change consistency after being worked thousands of times

Available Grades
- NLGI 2 (4025) – also available as an aerosol spray
- NLGI 1 (4024)
- NLGI 0 (4023)
- NLGI 00 (4022)

Proprietary Additive
LE’s proprietary additives are used exclusively in LE lubricants. H1 Quinplex® Food Machinery Lubricant contains Quinplex.

Quinplex® impact-resistant additive contributes to outstanding water resistance, tackiness and enhanced mechanical stability, and helps to form a barrier against corrosion.
LE vs. Competitive Food Grade Lubes

**Water Resistance**

Water Spray-off, ASTM D4049
The significantly lower percent loss in the Water Spray-off test proves that the LE grease outperforms the competitors in resisting water, staying in place rather than washing off.

**Temperature Resistance**

Oxidation by PDSC, ASTM D5483
The minutes to onset of oxidation of the LE grease is four times that of the nearest competitor tested, indicating its ability to resist heat.

**Wear Resistance**

Four-Ball EP Load Wear Index, ASTM D2596
This test is a measure of a lubricant’s ability to carry a load and minimize wear. The higher the value, the better the job the lubricant does. The LE grease outperforms all of the competitive greases tested.

**Extreme Pressure Performance**

Timken OK Load, ASTM D2509
The higher Timken load carried shows that The LE grease has superior EP load-carrying capability over the competitive greases tested.

1919 E. Tulsa • Wichita, KS 67216 • Fax: 800-228-1142
LE operates under an ISO 9001 Certified Quality System.

H1 Quinplex® Food Machinery Lubricant

Typical Applications

- Blenders
- Bottle Washers
- Cams
- Carbonators
- Conveyors
- Cookers
- Crowners
- De-hairing Machines
- Dividers
- Electric Motors
- Extractors
- Feather Pickers
- Filling Machines
- Food Carts
- Knives
- Labelers
- Mixers
- Molders
- O-Rings
- Packaging Machines
- Proofers
- Saws
- Sifters
- Slicers
- Slides
- Wrappers

### Performance Requirements

**Met or Exceeded**
- NSF H1 registered for incidental food contact
- Halal (certified by IFANCA)
- Kosher Pareve
- 4025 & 4024: Ex-Cell-O Corp-Pure-Pak Machine
- 4025: General Mills - A Lubricant
