

# 2059 MONOLEX® PENETRATING OIL & LUBRICANT

KLM & W FARM, Bernice, LA

Ford Jubilee Tractor • SIC 0191 General Farms

**2059 ACTS RAPIDLY TO PENETRATE AND DISSOLVE MOST RUST,  
GUM AND VARNISH, FREEING “FROZEN” PARTS.**

## CUSTOMER PROFILE

Wright Clements KLM & W Farm has been in the cattle and hog farming business for twenty years. KLM & W Farm is located west of Bernice, Louisiana.

## APPLICATION

Owner Wright Clements has an old Ford Jubilee Tractor. It has been left out in the elements for several years with the same tires on it.

## AREA OF INTEREST

Mr. Clements needed to change the back tires but he found the ‘lug nuts’ were rusted and frozen solid in place. He tried several socket wrench sets only to end up with broken sockets. He next tried a cheater pipe on a brake over handle over a socket, but it bent under the tremendous pressure and still the nuts would not budge. Even an impact wrench would not budge the nuts.

## LE SOLUTION

Local LE Representative Jesse Carter, introduced 2059 MONOLEX Penetrating Oil and Lubricant to Mr. Clements while visiting another customer. 2059 has excellent penetrating and rust loosening properties while only a light oil film is left as it is sprayed on the application. It also has a pleasant smell. An aerosol can was given to Mr. Clements to try on his tractor lug nuts.

## CUSTOMER COST SAVINGS

Mr. Clements was ready to try anything, but doubted that a simple penetrating oil would help. He liberally sprayed 2059 MONOLEX Penetrating Oil and Lubricant on the lug nuts and let it sit for awhile as he tended to other business. After returning an hour later, Mr. Clements used a wrench to take the lug nuts off without any resistance or problem.

*“I couldn’t believe the difference that LE’s 2059 made and how much easier it made the job. If I had only known about it before, I could have saved several sets of wrenches,”* he said. *“I would definitely recommend it to anyone that is working around frozen or rusted parts. Even if you have to wait a short while as the penetrating action gets to the core of the problem, it’s better than using a cutting torch or other more expensive alternatives.”*

We wish to thank Owner Wright Clements and LE Representative Jesse Carter (pictured) for the information provided to prepare this report.

Based on actual user experience. Individual results may vary. Product used not intended to supersede manufacturer's specifications.
