Dear Jim:

Just a note to let you know how the LE 3752 grease compared to what I was using (Conoco Redtack). I have two wheel loaders; a Case 621C and a Caterpillar 930. I greased one side of each loader with your LE 3752 and Conoco Redtack.

After running each machine 25-30 hours, I pulled the main bucket pins off each machine for the test results. The Conoco Redtack pins were dry, the LE 3752 ones still had a good film on the pins. I am totally satisfied with the LE 3752 grease and how it performs. I have cut my grease intervals by 70% on my wheel loaders, fork lifts and other equipment.

Thanks for the great service.

Steve Marks

Other Products Used

- Monolec® Gear Lubricant (703)
- BTU+ Power Supplement & Cleaner (2420)
- Monolec® Hydraulic Oil (6520)
- Monolec® Power Fluid (7500)
- Monolec Ultra® Engine Oil (8800)

Marks Lumber's Reliability program goes beyond the LE oil program and oil sample program. They also use Oil Safe containers to transfer oil and Esco Oil Sight Glasses for monitoring oil condition. In line filter systems from Pezoldt Petroleum Products are also utilized on the hydraulic systems and rolling stock engines. It is truly a complete Reliability program with LE as the key player.

Thank you to Steve Marks, owner, and to Jim Pezoldt, LE lubrication consultant, for providing the information used in this report.
