## Almagard® Vari-Purpose Lubricant (3752) Pyroshield® Syn Open Gear Grease (5182)

**Jess Trucking Company – Fremont, Calif.**

**Peterbilt Trucks**

### **Customer Profile**

Jess Trucking Company is a nine rig common carrier hauling for the State of California. They have been an LE customer since 1990.

### **Application**

Mike Bettencourt, owner/operator, has used many commercial and specialty products as a chassis lubricant on his nine Peterbilt trucks.

### **Challenge**

The specialty greases were pounding out and washing out, requiring frequent relubrication.

### **LE Solution**

Several years ago it was recommended that Mike Bettencourt try LE's Almagard® Vari-Purpose Lubricant (3752) as a general purpose grease for the fleet. Almagard 3752 is a multifunctional, extreme pressure (EP) lubricant for extended service under extreme conditions. It can be used in all types of vehicles, as well as in many other applications. It is very tacky, has excellent water resistance, will not pound out and is rust and corrosion inhibited. Almagard 3752 contains LE's proprietary additives Almasol® and Quinplex®.

### **Results**

Over the years Mike Bettencourt has been very pleased with the performance of Almagard 3752. When it was recommended that he use LE's Pyroshield® Syn Open Gear Grease (5182) to protect the fifth wheel on these trucks, he was confident that it would perform. Before switching to Pyroshield 5182, the fifth wheel was requiring relubrication once a week. Using Pyroshield 5182, the fifth wheel requires greasing only once every three weeks. Pyroshield 5182 is a revolutionary extreme pressure (EP) lubricant that was developed for applications in the most severe service. It is ideal for fifth wheels and various other sliding mechanisms which operate in harsh environments and it contains Almasol, LE's exclusive wear-reducing additive. Mike Bettencourt said, "LE's 5182 is so tacky I broke a putty knife putting it on."

### **Other Products Used**

- Mike Bettencourt also uses L-X® Heavy-Duty Chemical Supplement(2300) in his personal vehicles.

*Thank you to Mike Bettencourt, owner/operator, and to the local LE lubrication consultant, for providing the information used in this report.*
