

**3752 ALMAGARD® VARI-PURPOSE GEAR LUBRICANT  
FREMONT UNIFIED SCHOOL DISTRICT, CA**

**Toro Rotary Mower and a MOD Flail-type Mower  
SIC 8211 Elementary & Secondary Schools**

**CUSTOMER PROFILE**

The Fremont Unified School District, Fremont, California, maintains their school grounds with a Toro rotary mower and an MOD flail-type mower. The Fremont Unified School District has been an LE customer since 1983.

**APPLICATION**

They use LE's 3752 Almagard Vari-Purpose Lubricant in the blade bearings on their Toro and MOD mowers.

**AREA OF INTEREST**

They were using a commercial grade grease, which would wash out when they were cleaning the mowers. This resulted in the need to replace bearings two to three times per year. The cost of the bearings was approximately \$30, plus downtime and man-hours to replace the bearings.

**CUSTOMER COST SAVINGS**

Since switching to LE's 3752 Almagard Vari-Purpose Lubricant, the bearings last

**Bearings were changed 2-3 times a year.**

**With 3752 they are lasting approximately two years!!**

approximately two years. LE's 3752 is a multi-functional lubricant for extended service under extreme conditions. It is very tacky and its excellent water resistance allows it to stay in place even when the machines are washed down. LE's 3752 contains Almasol® and Quinplex®, LE's exclusive wear-reducing additives. Lynn George says they have tried other specialty greases, but they all have a tendency to wash out. They are sticking with LE's 3752.

**OTHER LE PRODUCTS USED**

LE's 3752 Almagard® Vari-Purpose Lubricant is also being used on the school bus fleet at the Fremont Unified School District. It is used on fan bearings, wheel bearings and other grease application points.

We wish to thank Lynn George for the information provided to prepare this report.
