

# 3752 ALMAGARD® VARI-PURPOSE LUBRICANT

GE TRANSPORT, Carson City, NV

Various Equipment • SIC 4213 Trucking, except local

**Ability to provide superior lubrication and protection in the most severe applications over long service intervals**

**CUSTOMER TESTIMONIAL**

## CUSTOMER PROFILE

GE Transport, Inc. of Carson City, Nevada, has been in business for over thirteen years. They do business of heavy hauling of cement and equipment in a severe environment that, more often than not, includes travel over remote, unpaved mine access roads. "Pinky" Grey and Charlie Evans are co-owners of GE Transport, Inc.

## APPLICATION

GE Transport operates seven tractors and twenty three trailers in dry bulk, flatbed and "low boy" hauling within the State of Nevada. The roads these pieces of equipment travel on are dusty in the summer and have standing water or snow in the winter. Treated with magnesium chloride solution to help hold down dust (short term!), these mine roads also present a very corrosive and abrasive environment for mechanical equipment.

## AREA OF INTEREST

Based on his previous experience with LE products, "Pinky" Grey wanted to provide maximum protection to all greased components of GE's equipment to help protect their considerable capital investment.

## LE SOLUTION

Recommended by the local LE Lubrication Consultant, LE's 3752 ALMAGARD Vari-Purpose Lubricant exceeded all of GE Transport's requirements for performance and protection. *LE's 3752 is a multi-functional, EP lubricant designed for service under extreme conditions. It is very tacky, will not pound out and has excellent water resistance. It also contains ALMASOL® and QUINPLEX®, LE's proprietary additives.*

## CUSTOMER COST SAVINGS

In their thirteen years of operation, GE Transport has experienced no U-joint failures and no king pins and bushings or spring pins and bushings have had to be replaced. GE Transport greases their seven Kenworth tractors and various configuration trailers at intervals of between 12,000 and 16,000 miles. LE's 3752 ALMAGARD Vari-Purpose Lubricant has been used throughout the company's history to service this grease application. LE's 3752 proves, once again, its ability to provide superior lubrication and protection in the most severe applications over long service intervals.

*We wish to thank "Pinky" Grey, Co-Owner and the local LE Lubrication Consultant for the information provided to prepare this report.*

Based on actual user experience. Individual results may vary. Product used not intended to supersede manufacturer's specifications.
