## Almagard® Vari-Purpose Lubricant (3752)

*Pass Christian Public Works – Pass Christian, Miss.*

### *Various Equipment*

- *Lasts five times longer than commercial grade lubricant*

#### **Customer Profile**

The Pass Christian Public Works provides Pass Christian, Mississippi maintenance in several departments of the city. The Public Works provides maintenance for vehicles used by the city functions and all kinds of road equipment that is used to do the upkeep of the city roads and highways.

#### **Application**

Pass Christian maintains many different pieces of equipment for the city. Some of these include a Vermeer wood chipper BC1000, 416C Cat backhoe, police cars, Chevrolet C7500 dump trucks, 320 track hoe and 6640 Ford tractor.

#### **Challenge**

They were looking for a grease that would stay in place and not sling off. With the previous commercial grade lubricant, they had to grease every day due to the grease not staying in place.

#### **LE Solution**

The local LE lubrication consultant recommended Almagard® Vari-Purpose Lubricant (3752), which is a multi-functional extreme pressure lubricant for extended service under extreme conditions in many different applications. It is very tacky, has excellent water resistance, will not pound out and is rust and corrosion inhibited.

#### **Results**

Carl Teague, maintenance manager, stated Almagard 3752 has reduced his workload because he doesn't have to grease near as often as with the commercial grade lubricant. For example, on the BC1000 Vermeer wood chipper, Carl used to have to grease it everyday due to the grease not staying in place. With Almagard 3752, he only greases once a week and says that the grease really could last longer. Almagard 3752 lasts five times longer than commercial grade lubricant.

### **Other Products Used**

- The 6640 Ford tractor's transmission was making an awful noise and sounded like it was on its last leg. When Carl Teague converted it to Almasol® Vari-Purpose Gear Lubricant (607), there was a very noticeable difference in the operation, the noise has been eliminated and it has run great ever since.
- Carl also stated that there were leakage problems with the hydraulic oil until he began using Monolec® Power Fluid (7500). Now it runs much cooler and hose and seal leaks have been eliminated.
- They use Nutrigent Industrial Cleaner (2100) for cleaning the shop floor and equipment. It does a wonderful job and doesn't leave a white film as most cleaners do.
- Pass Christian also use H1 Quinplex® Penetrating Oil & Lubricant (4059) and H1 Silicone Spray (804) on various applications throughout the shop.

*Thank you to Carl Teague, maintenance manager, and to the local LE lubrication consultant, for providing the information used in this report.*
