

4622 MONOLEC MULTIPLEX® Lubricant
Snow Basin Ski Area, Huntsville, UT
Ski Lifts • SIC 7999 Amusement & Recreation

LE's 4622 HAS ELIMINATED DOWNTIME DUE TO BEARING FAILURE AND ELIMINATED THE CONTINUAL GREASING.

CUSTOMER TESTIMONIAL

CUSTOMER PROFILE

Snow Basin Ski Area is a ski resort and year round recreation area. They were also one of the venues for the 2002 Winter Olympics.

APPLICATION

Snow Basin has various ski lifts to transport skiers and other visitors up the mountain.

AREA OF INTEREST

While Snow Basin Ski Area was using a commercial grade lubricant they were experiencing problems with the lubricant staying in the bearings. In cold weather it would not move, and in warm weather it would run out. They had to use one lubricant in the winter and a different one for the summer causing short bearing life. These lifts need to work day in and day out without downtime. Downtime for bearing failure is unacceptable.

LE SOLUTION

LE's 4622 MONOLEC MULTIPLEX® Lubricant was recommended. LE's 4622 is a lithium-complex extreme pressure grease that meets NLGI

GC-LB specification. 4622 is for plain and anti-friction bearings. It has excellent low temperature pumpability, good mechanical stability, a high dropping point, and corrosion resistance.

CUSTOMER COST SAVINGS

Since they started using LE's 4622, they have had no lubricant come out of the bearings when ambient temperatures exceed 90°F. LE's 4622 continues to work when it is snowing or when temperatures drop below 0°F.

LE's 4622 has eliminated downtime due to bearing failure and eliminated the continual greasing they had to do while using the commercial grade lubricant.
